Predictive Services Discussion: An upper low will move across southwest Canada with ridging across the southern US while a weak upper low and the remnants of Henri move through New England. Upper ridging will also extend through the Great Lakes. Breezy to windy and dry conditions are likely across the Great Basin and much of the Rockies into northern Arizona. The strongest winds are forecast to occur near and east of the Divide in Wyoming and the adjacent High Plains where winds could gust to 40 mph with relative humidity down to $10 \%$. Dry conditions are forecast for much of the West except for isolated mixed wet/dry thunderstorms over southwest Montana into central Wyoming with isolated to scattered monsoonal thunderstorms over southeast Arizona, western New Mexico, and the Colorado Rockies. Heavy rain and potential flooding remain possible over New England associated with the remnants of Henri. Temperatures will remain below normal for the northern Intermountain West, but rise above normal for the Southwest, central Rockies, southern/central Plains, and much of the eastern US.

## Communications (LCES) <br> Fire Communications Category

Effective communication is a critical component of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
- Knowledge of the radio issued to the individuals.
- Net control, frequencies.
- Line-of-sight restrictions.
- Antenna polarization effect (direction of the antenna).
- Minimizing noise interference.
- Wide band vs. narrow band.
- Potentially unfamiliar local jargon (e.g., Coulee, candlestick, fence post, etc.).
- How can you mitigate potential problems?
- Implement effective communication procedures - be brief, use clear text and to-the-point messages.
- Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide (IRPG), PMS 461).
- Confirm that relayed information is received and understood.
- Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; and solicitation of feedback).
- Establish emergency check-in procedures.
- Provide a minimum of four radios per 20-person firefighter crew.
- The Five Communication Responsibilities for all firefighters:
- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know.
